

ADD MY LOCATION

ADD MY LOCATION

Have you considered using your home, land, office building, warehouse, restaurant, bar, hotel or other locations to be utilised as a filming location? Films, television shows, commercials, music videos and still photo shoots are always looking for the perfect location for their production, so if you think you have the perfect scenic, picturesque, quirky and/or distinct location send it to us at Screenwest to add to our online location library and your location could be seen on the big or small screen.

WHAT MAKES A SUCCESSFUL LOCATION?

It's not just the visual look of your property that is taken into consideration when choosing a film location. Other factors come into play; size is important, and parking is always a crucial factor – there are often many equipment vehicles attached to a shoot, so this will be a major consideration. Is the property conveniently located for the production company? Will you allow decorating? How big are the rooms?

Inclusion of a property in the Screenwest location library places the owner under no obligation whatsoever to accept the proposed film shoot onto the premises. Each project is individually assessed in terms of its budget, schedule and the scenes to be filmed. It is up to you to decide if you want to allow that particular production to use your property.

Please note not all properties will be listed within our location library. We reserve the right to omit images and listings of property at our discretion.

Filming activity in a neighbourhood can create parking, noise, and traffic congestion that can cause substantial strain for other residents and businesses.

Therefore, a production company is required to gain permission from the applicable authority prior to filming. Please be aware that issuance of a permit is not guaranteed.
